## A. Introduction

In this exercise you will learn how to pick locks!

## B. Procedure

1. Check out one of the lock-picking sets from the 9th floor academic office. You can keep it for 24 hours.
2. Practice until you can pick as many of the locks marked 1-5 as possible.
3. *You can only use a regular pick and the tension wrench!*
4. *You cannot do raking or lock bumping!*
5. *Be careful with the lockpicking kits!!!*

## C. Restrictions

In this picture you can see, in order, from the left,

- Rake Pick
- Single Ball Pick
- Small Diamond Pick
- Short Hook Pick
- Standard Tension Tool

Of these, you *cannot* use the rake pick.

## D. Assessment

1. Sign up with the TA for an assessment. You will get 15 minutes to try to open the locks.
2. We will start the assessments on October 7.
3. You will be assessed based on the highest lock you have successfully picked:

Highest lock picked	Points
#1	70
#2	80
#3	90
#4	95
#5	100
